

The New Secura[®].
Safe & Secure Weighing.

Reduce Your Risk with Integrated
and Intelligent

Protection Systems

Secura[®] gives you the security and peace of mind of knowing that you have done everything right. Besides providing highly accurate weighing results and operating convenience, Secura[®] also features built-in protection systems for complete reliability and regulatory compliance – the safe and secure way.

Real-time guidance prompts for leveling, automatic internal adjustment and 100% traceable, clear documentation with sample and batch identifiers make your lab work more efficient.

First, the new operating concept of Secura[®] will noticeably ease your daily workload during weighing and, second, its APC function – Advanced Pharma Compliance – will relieve you from tedious and time-consuming documentation and monitoring tasks.

2013 GOLD

A close-up photograph of a white and stainless steel laboratory weighing scale. The scale has a glass draft shield and a weighing pan. A small glass vial containing a white powder is on the pan. The brand name 'Secura' is printed in white on a dark grey panel at the bottom of the scale.

Secura

Always Correctly Levelled with Sartorius LevelControl

Avoid errors caused by an unlevelled balance with real time leveling support - therefore every Secura® has an opto-electronic sensor that continuously checks whether the balance is perfectly levelled. If it detects any out-of-tolerances, you will be immediately alerted to this pending risk and see specific guidance prompts to help you level the balance.

Output of the weighing data over the interface port will be temporarily interrupted until the balance has been correctly levelled again.

This means you can rest assured knowing that only correct data is transmitted. During leveling, you will not have to change your seated position. More importantly, when working with toxic substances under a laboratory fume hood, you will not have to lean over the balance while leveling it. As a result, Secura® rules out the risk of health hazards.

No Risk Due to Temperature Fluctuations

Temperature fluctuations have an influence on the accuracy of your weighing results.

This is why every Secura® comes equipped with the internal adjustment function isoCAL that ensures consistently accurate results.

Secura® can be configured to prompt you to launch this procedure or to have isoCAL take care of this as soon as an activation threshold is reached.

The Cal Audit Trail function records each isoCAL procedure performed so it can be traced for your quality assurance.

Stress-Free USP Compliant Measurements

Compliance with the new USP, Chapter 41, requirements (valid from 1st of December, 2013) with absolute process reliability? No problem for the Secura®.

SQmin automatically detects and clearly indicates on the display if you are out of the accepted operating range. In addition, the balance will temporarily block the data transfer to a printer or a device connected to its interface port.

This gives you peace of mind knowing that inadequate data cannot be further processed by accident.

Our specially trained service staff will determine the operation range for you right at the balance's site of installation, program it into your Secura® and attach a corresponding verification seal to the balance.

 sartorius

Secura

Security by Password Protection

Secura® comes with password protection to restrict adjustment of the balance settings only to authorized persons.

If you set a password, all functions that could change the metrological performance specifications are inactivated.

Interactive User Guidance for Fast GLP- | GMP-Compliant Printouts

If you require traceable documents, Secura® will guide you through the steps for obtaining GLP- | GMP-compliant printouts with proper time and date stamps. The novel user guidance will support you especially for working with traceable sample and batch identification.

Used in conjunction with the new premium laboratory printer YDP30, which is automatically detected by Secura®, the balance generates printouts of the results on standard printer paper or on endless labels.

Best Results – Quality Documentation Made Easy

Secura® features a Cal Audit Trail function to document the quality of each weigh-in procedure you perform.

Each combined calibration and adjustment procedure and each leveling process, including any

non-conformities, are recorded by the balance, can be viewed on the touch screen and, if necessary, can be transferred over the balance's interface port to a computer or to a Sartorius laboratory printer.

Cleanability to Secure the Best Results

Cleanliness is one of the main prerequisites in the laboratory to prevent contamination and ensure work area safety.

That's why Sartorius placed a premium on designing Secura® to enable easy and thorough cleaning.

Sleek, resistant surfaces plus clear contours and few edges ensure that Secura® will help you stay compliant with all hygiene requirements. Even the chemically resistant housing makes cleaning the Secura® a breeze.

Regulatory Compliance with Expert Support

Do you use your Secura® or other instruments in a regulated area and have to comply with a multitude of requirements, regulations and directives? Relax. Sartorius Lab Products & Services will provide you with the appropriate expert services specifically tailored to ensure compliance with the strict requirements of e.g. the pharmaceutical industry – and not just for balances.

Qualification – IQ | OQ Documentation

Do you need qualification documents as proof of suitability to be able to use your Secura® in a regulated area? Sartorius Lab Products & Services will support you by providing trained specialists on site. We will

generate the documents you need according to risk-based test plans and test reports for installation and operational qualification.
